4. Doors wider and/or higher are not warranted against warp. Warp is any distortion in the door itself, and does not refer to the frame or jamb in which it is hung. The term warp shall include the related terms of bow, cup and twist. If the claimed nonconformity is warp, **Adottitalia** may defer repairing or replacing the product for a period up to twenty-four (24) months from the date the product was installed, as it is not uncommon for a temporary warp condition to occur as the door adjusts to local humidity and temperature conditions.
5. Bow or nonalignment in the frame or jamb in which the door is hung.
6. Variations or unsatisfactory results in the finish, texture or appearance resulting from the application of paint or other finishing material. The physical appearance of the door is not covered by this warranty.

10. Any and all damages resulting from exposure due to the installation in an unprotected opening site.
11. Temperature, humidity and direct sunlight may cause the wood panels in your door the shrink slightly, leaving an unstained line along the edge of the panel. This movement is to be considered normal, and the door construction is designed to allow this movement.
